

AMENDMENTS TO THE CLAIMS

1 - 3 (Cancelled).

4. (Currently amended) An assembly comprising a vehicle door which includes an inner panel having opposed vertically disposed edges, a vehicle lock, a window pane, a window pane drive mechanism adapted to move the window pane from a first position to a second position, and a ~~window pane guiding~~ mechanism consisting of a pair of rails disposed on the opposing edges of the inner panel of the door so as to guide the window pane as the window pane is moved by the window pane drive mechanism, wherein the window pane drive mechanism consists of a motor, two vertically disposed guide pulleys each having a shaft which is directly mounted to the inner panel, a driver driven by the motor and disposed vertically between the guide pulleys and horizontally spaced from the guide pulleys, a single drive cable which traverses only two pulleys and the driver forming a triangular loop, a support mounted on the window pane and fixed to a portion of the cable extending from one guide pulley to the other, and optionally, a gear assembly.

5 - 7. (Canceled)

8. (Previously presented) The assembly of claim 4, in which the rails are U shaped and the window pane is disposed between the legs of the U.

9. (Previously presented) The assembly of claim 8, in which the motor is an electric motor.

10. (Cancelled)

11. (Previously presented) The assembly of claim 9, wherein the window pane drive mechanism includes the gear assembly.

12 – 14 (Canceled).

15. (Previously presented) The assembly of claim 4, in which the motor is an electric motor.

16. (Previously presented) The assembly of claim 15, wherein the window pane drive mechanism includes the gear assembly.

17 – 18 (Canceled).

19. (Previously presented) The assembly of claim 4, in which the single drive cable is tensioned by a spring.

20. (Previously presented) The assembly of claim 19, in which the single drive cable is tensioned by a pair of springs.

21. (Previously presented) The assembly of claim 20, wherein the vehicle lock and window pane drive mechanism are interconnected.

22. (Previously presented) The assembly of claim 4, wherein the vehicle door and window pane drive mechanism are interconnected.
